SKILLS

Languages: C++, Python, JavaScript, SQL

Technologies & Tools: HTML, CSS, ReactJS, Redux, NodeJS, ExpressJS, FastAPI, Flask, MongoDB, MySQL, Git/GitHub, BitBucket, Docker, Elasticsearch, Kibana, JIRA

AI/ML & Data Science: Scikit-learn, Pandas, NumPy, Streamlit, LLM, RAG, GenAI, Computer Vision

WORK EXPERIENCE

QuickHeal Technology, Pune

Jan 2025 - Jun 2026

Software Engineer

Python, MySQL, FastAPI, Flask, Elasticsearch, ReactJS, ML

- Led a project to detect samples from diverse sources, applying marking on **cloud platforms** that elevated product quality by **50%**.
- Automated a manual marking process, reducing processing time by **80%** and boosting operational efficiency.
- Conducted in-depth **MySQL** database research and refined complex queries, reducing data retrieval time by **40%**.
- Documented technical findings and presented database optimization strategies to senior engineers, improving team knowledge sharing and optimizing overall project efficiency by **40%**.
- Collaborated with cross-functional engineering teams to diagnose and resolve critical bugs, improving overall project functionality and processing speed by **30%**.

PROJECT WORK

Ecomzy

HTML5, CSS3, JS, ReactJS, Redux, NodeJS, MongoDB, Docker

- Achieved **100%** secure authentication with **OTP (Nodemailer)**, **JWT** access control, and token expiration management.
- Revamped image handling with **Cloudinary**, reducing load times by **40%** for improved user experience.
- Streamlined checkout with order summaries, achieving an **80%** efficiency rating.
- Deployed secure transactions via **Razorpay**, reducing checkout time by **30%** and boosting conversion rates.

AI Gym

Python, Streamlit, MediaPipe, WebRTC, LLM, SQLite, OpenCV

- Reduced exercise monitoring effort by **80%** by implementing **WebRTC** and **MediaPipe**-based pose tracking, enabling real-time detection across **5** workout types.
- Boosted form correction accuracy by **90%** by integrating a **LLM** and **Text-to-Speech** coaching pipeline, delivering instant audio feedback on workout events.
- Enhanced movement analysis by **85%** by implementing real-time biomechanical metrics from **pose landmarks**, enabling precise posture and alignment assessment.
- Increased workout retention by **100%** by developing a **SQLite**-based tracking system, providing persistent exercise history with reps, sets, and duration analytics.

AI Attendance (SnapClass)

Python, Streamlit, Face Recognition, Text Recognition, SQLite

- Reduced student authentication time by **85%** by implementing **Face** and **Voice Recognition** using **Python**, **OpenCV**, and **Embedding Models**, enabling secure passwordless login.
- Strengthened data security by **100%** by implementing encrypted password storage and authentication workflows using **Python** and **MongoDB**, ensuring secure access to attendance records.
- Automated attendance management for **100+** students simultaneously by implementing **Computer Vision** and **Voice Verification** models, reducing manual effort and improving accuracy.
- Simplified lecture enrollment by **70%** by implementing **QR Code** and link-based registration using **Streamlit**, increasing accessibility and participation.

EDUCATION

BBDU Lucknow

Aug 2020 - Jun 2024

B.Tech in Computer Science and Engineering

CGPA: 8.4/10

Relevant Coursework: Object Oriented Programming, Databases, Discrete Maths, Data Structures and Algorithms, Operating Systems, Computer Networks, Artificial Intelligence, Machine Learning, Deep Learning, Data Mining, Advance Data Structures and Algorithms, Information Retrieval, Image Processing

CODING PLATFORMS

- Achieved a **95%** accuracy rate while tackling **450+** coding problems on **Code 360**.
- Solved over **230** coding problems on **GeeksforGeeks**, showcasing proficiency in Data Structure and Algorithms.

AWARDS AND CERTIFICATES

Data Structure and Algorithms - Code 360

Web Development Master Course - CodeHelp
