## Skills

**Languages:** C++, Python, JavaScript, SQL

**Technologies & Tools:** HTML5, CSS3, ReactJS, Redux, NodeJS, ExpressJS, MongoDB, MySQL, Git/GitHub, Docker

## Work Experience

**QuickHeal Technology, Pune**

Jan 2025 - Present

**Software Development Engineer**

Python, SQL, OOPS, HTML5, CSS3, JS

- Lead and manage the File-Based Malware Detection and Classification System, a tool to identify files as malware or non-malware.
- Built a Python framework for performance testing, reducing private build testing costs for third-party AV certification.
- Handle back-end services in Python, integrate with internal modules, and collaborate with teammates for delivery.
- Utilize a range of libraries and framework components to streamline functionality and improve detection accuracy.
- Diagnosed and resolved critical bugs, increasing overall project functionality and processing speed.
- Developed a disaster recovery infrastructure, ensuring business continuity in case of system failures.

## Project Work

**Automated Malware Classification System**

Python, SQL

**QuickHeal**

2025

- Utilized Python for malware analysis, enabling accurate classification of malicious, suspicious, and clean files.
- Designed and implemented backend features, automation scripts, and system enhancements using Python to improve scalability and robustness.
- Conducted in-depth MySQL database research and refined complex queries, reducing data retrieval speed.

**Performance Testing Framework**

Python, ElasticSearch, HTML5, CSS3, JS

**QuickHeal**

2025

- Built a custom Python-based framework to simulate and measure build performance for antivirus engines.
- Developed Python-based workflows to detect and eliminate false positives, boosting overall detection quality.
- Engineered Python automation frameworks for AV certifications, helping achieve the Best Performance Award.

**Ecomzy**

HTML5, CSS3, JS, ReactJS, Redux, NodeJS, MongoDB, Docker

- Developed Ecomzy, an online ordering platform, improving user interaction by 20% and retention by 15% through optimized Add To Cart functionality.
- Implemented secure authentication (OTP, JWT) and streamlined checkout with order summaries, boosting efficiency by 80%.
- Optimized performance with Cloudinary for faster image loading and integrated Razorpay for secure transactions, reducing checkout time by 30%.

## Education

**BBDU Lucknow**

Aug 2020 - Jun 2024

B.Tech in Computer Science and Engineering

**CGPA: 8.4/10**

Relevant Coursework: Object Oriented Programming, Databases, Data Structures and Algorithms, Operating Systems, Computer Networks

## Coding Platforms

- Achieved a **95%** accuracy rate while tackling **450+** coding problems on **Code 360**.
- Solved over **230** coding problems on **GeeksforGeeks**, showcasing proficiency in Data Structure and Algorithms.

## Awards and Certificates

- **Performance Award** : Secured Best Performance Award at AV-Test.
- Data Structure and Algorithms on Code 360
- Web Development Master Course on CodeHelp
